

## Client Think BDW Ltd.

### Scope of job

Think BDW Ltd is part of the UK's largest integrated marketing services group, The Mission Marketing Group plc. Following their office move they asked us to install new air conditioning and ventilation equipment to service their new office space.

**Project Location:** Colchester, Essex.

### What the project entailed

Think BDW Ltd originally had three sites in Colchester and their new building brought all of these together into one building. Their new larger building required a new modern looking system that complemented the attractive building and internal space. Adcock was commissioned to install a new air conditioning and ventilation equipment into their open plan working space.

### What we brought to the job

Adcock had installed and maintained the air conditioning at their previous office and therefore they wanted us to install the new system in their new office.

**Job Value:** £80,000

**Date of installation:** 2014

### Equipment installed

For the air conditioning we installed Mitsubishi Electric ceiling cassettes and wall mounted units, and Lossnay units were installed to provide fresh air ventilation. Ongoing maintenance will also be provided to keep the systems clean, efficient and working optimally.

The Mitsubishi Electric Equipment looks very good and is very effective.

### Testimonial

*This was a difficult project because of time constraints and site problems. Adcock have always looked after us and didn't disappoint on this project.*

Marcus Tinwork,  
Head Designer
