

Refrigeration Project Engineer, Cambridge

Adcock Refrigeration and Air Conditioning are on the lookout for a highly skilled project engineer to join their successful team in Cambridge.

The role:

- As the Project Engineer you will be responsible for overseeing your own projects right from the initial survey, through to designing appropriate systems for customers and providing quotations, to overseeing installation and finishing.
- You will provide technical expertise and advice to customers, engineers and colleagues.
- You will be responsible for managing costs and budgets on jobs for which you are responsible.
- You will be proactive in maintaining good relationships with current customers and forging opportunities with new customers.
- You will ensure that all Health and Safety procedures are followed by yourself and your colleagues at all times.

The candidate:

- Proven design and project management experience on a wide range of Refrigeration and Air Conditioning systems and applications.
- Expert technical skills and knowledge of all manner of refrigeration systems and cold rooms designed for commercial sites such as pharmaceutical, manufacturing and food processing.
- Excellent technical skills and knowledge of a wide range of air conditioning systems and chillers.
- High financial and commercial awareness with the ability to manage large budgets and resources.
- Excellent communication skills with the ability to forge strong business relationships with customers, suppliers, colleagues and contractors.
- A thorough understanding of and ability to deliver outstanding customer service.

We offer a very competitive package, and a company car.

To apply, please email your CV and a covering letter, outlining your suitability for this role, to hr@adcock.co.uk. **Please type the job title of the role you are applying for in the Subject Line of your email.**
